Omnis Multi-Manager Cautious Fund

Investment Manager Market Review

Quarter 1, 2018

The Fund was down slightly during the period. As markets rallied at the beginning of the year, we grew sceptical about the sustainability of the momentum and reduced risk in the portfolio by shifting some of our holding in Vanguard S&P 500 exchange-traded fund (ETF) to iShares USD Treasury Bond 7-10yr ETF. Actively managed funds produced the month's best performances, particularly Artemis US Extended Alpha, Vanguard500 ETF, and with ASG Managed Futures reversing a small loss in the previous month.

In February, we added to a number of equity holdings, including Vanguard S&P500 ETF, iShares MSCI Japan ETF and iShares Asia Pacific ex Japan ETF. We also rotated holdings that invest in UK equities by switching from Lindsell Train UK Equity to Majedie UK Equity and JOHCM UK Dynamic Fund. Strong performances from emerging market bonds benefited our holding in iShares Local Emerging Bond ETF.

Funds that invest in government bonds were the portfolio's best performers in March, notably iShares Core UK Gilts ETF. PIMCO Global Investment Grade Credit did well following its recent move to a more defensive investment strategy, while Lindsell Train UK Equity performed satisfactorily.
