Omnis UK Gilt Fund, a sub-fund of Omnis Portfolio Investments ICVC

Share Class A Inc (ISIN GB00BF0XDK42)

The Fund is managed by Omnis Investments Limited.

OBJECTIVES AND INVESTMENT POLICY

Objective:

- The Fund aims to achieve a return consisting primarily of income and some capital growth which exceeds that of the ICE BoAML UK Gilt TR Index, after all fees and expenses, over a five-year rolling period.

Policy:

- The Fund intends to invest at least 95% in sterling denominated (or hedged back to sterling) AA-rated, government-backed securities, with at least 75% invested in UK government securities (Gilts).
- The Fund may also invest in other transferable securities, units in collective investment schemes (including exchange traded funds and other schemes managed and operated by the ACD or its associates), money market instruments, warrants, cash, near cash and deposits as detailed in the Prospectus.
- Derivatives may be used both for investment purposes and for efficient portfolio management.

Other information:

- The performance of the Fund will be measured against the ICE BoAML UK Gilt TR Index for target return purposes. This index was chosen as it was considered a fair representation of the assets in which the fund will invest, in line with its investment objectives and policy.
- The Fund intends to pay any income from your investments out to you twice a year.
- Investors' requests to buy, sell or switch shares will be carried out at midday on each working day (which excludes UK public holidays). A request received after midday will be dealt with on the next working day.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five to ten years and should be regarded as a long-term investment.
- Upon the sale of your shares, especially in the short-term, you may receive less than the original amount you invested.
- There can be no guarantee that the objective of the Fund will be achieved.

RISK AND REWARD PROFILE

- this indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- the risk category shown is not guaranteed to remain unchanged and may shift over time.
- the risk and reward indicator table demonstrates where a Fund ranks in terms of its potential risk and return. The higher the rank the greater the potential reward but the greater the risk of losing money. The lowest category does not mean 'risk free'.
- the Fund appears as a "4" on the scale. This is because the Fund invests in assets that typically carry medium risk and offer medium rewards compared with other categories of assets.

The indicator does not take account of the following risks of investing in the Fund:

Availability Risk: there may be less availability or demand for some investments which may make them more difficult to buy or sell.

Counterparty Risk: the insolvency of any institutions providing services such as safe-keeping of assets or acting as counterparty to derivatives or other instruments may expose the Fund to financial losses.

Derivatives Risk: derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the size of losses and gains, causing the value of your investment to fluctuate.

Financial Risk: there is a risk that a bank or building society could face financial problems, leading to the loss of some or all of the money on deposit.

Interest Payments Risk: there is a risk that the issuers of bonds may not be able to repay the money they have borrowed nor make any interest payments.

Investing in Bonds Risk: the value of bonds tend to decrease when interest rates and/or inflation rises.

Liquidity Risk: changes in market conditions may mean that it is not easy to buy or sell investments at a desired time and price.

Market Risk: the value of investments and the income derived from them may fall as well as rise and you may not get back the original amount invested. Over time, inflation may erode the value of investments.

For full details of the Fund's risks please see Section 5 of the Fund's prospectus.

CHARGES FOR THIS FUND

The charges you pay are used to pay the cost of running the Fund, including the cost of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges that may be taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested (Entry Charge) and before the proceeds of your investment are paid out (Exit Charge).

Charges taken from the Fund over a year

Ongoing charge	0.38%
----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	None
-----------------	------

The entry and exit charges shown are maximum figures. In some cases (including when switching to other funds) you might pay less – you can find out actual entry and exit charges from your financial adviser.

The ongoing charges figure is based on expenses for the twelve month period ending December 2019. Ongoing charges may vary from year to year. The figure for ongoing charges excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another fund.

For more information about charges please see Section 7 of the Fund's prospectus.

PAST PERFORMANCE

Past performance is not a reliable indicator of future results.

The Fund was launched on 29 September 2018. Share class A Inc was launched on 29 September 2018.
