

## OMNIS MANAGED PORTFOLIO SERVICE

**Toni Meadows**  
Chief Investment Officer

# OMPS Managed Portfolio Service monthly update for Adventurous investors

## Who is this investment for?

The Service is designed for an adventurous investor, who should be:

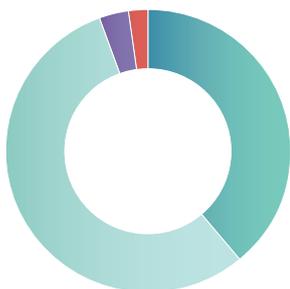

- An experienced investor who has used a range of different investment products in the past.
- In general terms, they will understand that investment products should be held for a minimum period of five years.
- They will be prepared to accept fluctuation in the value of their investments in order to be able to obtain a higher rate of return in the long run.
- They are similarly not likely to be concerned if the value of their investments were to fall in the short term.

The Service aims to deliver a total return and actively manage short-term risks through increasing or decreasing holdings in asset classes and individual funds. These allocations are determined by the Openwork Wealth Services Limited investment team, which benefits from full transparency of the funds' underlying investments, and is controlled through a strict governance framework.

## How we are managing your money

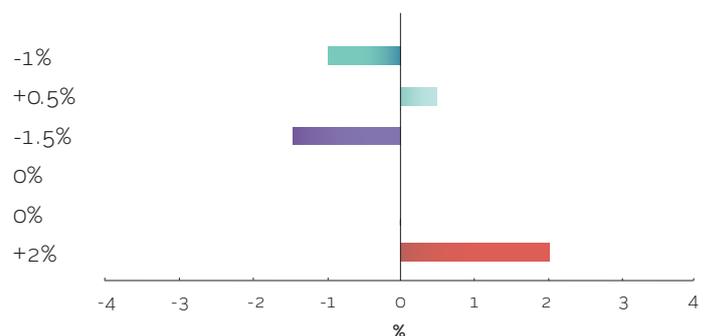

- Sterling was volatile as the deadline approached for Prime Minister Theresa May to agree a Brexit withdrawal deal with the EU.
- US equities rallied at the start of November as the Democrats took control of the House of Representatives in the midterm elections, but the tech and energy sectors weighed on performance later in the month.
- Early in the month, we reduced our underweight to the UK ahead of a possible Brexit resolution, and we topped up the holding in our Asia Pacific (excluding Japan) Fund.
- Later in the month, we trimmed our holding in the Global Bond Fund to reduce our exposure to a possible sterling rally as the UK and EU edged closer to a Brexit withdrawal deal.
- We used the proceeds to top up our UK All Companies Fund which should benefit from any breakthrough in Brexit negotiations.
- Towards the end of the month, we reduced our underweight in emerging market equities as valuations appeared attractive having underperformed for most of 2018.
- Our final trade in November saw us reduce our underweight in US equities following comments from the Federal Reserve chairman about slowing the pace of interest rate hikes.
- We also topped up the holdings in our European and emerging market funds due to attractive valuations.
- We continue to monitor global developments, particularly the Prime Minister's efforts to secure a parliamentary majority for the Brexit withdrawal deal and trade tensions between the US and China.
- Overall, the portfolio is marginally underweight equities, underweight fixed income, neutral alternative strategies and overweight cash.

## Current Asset Allocation

- 39% UK Equity
- 55.5% International Equity
- 3.5% Sterling Bonds
- 0% Non-Sterling Bonds
- 0% Alternative Strategies
- 2% Cash
