## Omnis US Equity Leaders Fund, a sub-fund of Omnis Portfolio Investments ICVC

Share Class A Inc (ISIN GB00BJRD8B13)

The Fund is managed by Omnis Investments Limited.

### OBJECTIVES AND INVESTMENT POLICY

#### Objective:

the Fund aims to achieve a return consisting of both income and capital growth, which, after all fees and expenses, exceeds that of the Russell 1000 TR Index over a five-year rolling period.

#### Policy:

- The Fund intends to invest at least 80% in the equity securities of US companies defined as those which are domiciled, incorporated or have a significant exposure to the US. Exposure to established larger companies will be greater than 50% of the Fund. Large companies are defined as those with a market cap of \$10 billion or more at the time of the Fund's investment. Companies whose capitalisation no longer meets this definition after investment will continue to be considered large capitalisation companies.
- the Fund may also invest in other transferable securities (for example, equity securities of other international companies), units in collective investment schemes (including schemes managed and operated by the ACD or its associates), money market instruments, warrants, cash, near cash and deposits as detailed in the Prospectus.
- it is envisaged that the investment portfolio of the Fund will be concentrated, typically comprising between 40 and 75 holdings.
- Derivatives may be used for the purposes of hedging and efficient portfolio management.

#### Other information:

- the performance of the Fund will be measured against the Russell 1000 TR Index for comparator and target return purposes only. This index was chosen as it was considered a fair representation of the assets in which the fund is able to invest, in line with its policy.
- the investment manager has discretion to select the Fund's investments and is not constrained by a benchmark.
- the Fund intends to pay any income from your investments out to you twice a year.
- investors' requests to buy, sell or switch shares will be carried out at midday on each working day (which excludes UK public holidays). A request received after midday will be dealt with on the next working day.
- recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five to ten years and should be regarded as a long-term investment.
- upon the sale of your shares, especially in the short-term, you may receive less than the original amount you invested.
- there can be no guarantee that the objective of the Fund will be achieved.

### RISK AND REWARD PROFILE

Potentially lower reward ← Potentially higher reward  
Lower risk Higher risk

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- this indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- the risk category shown is not guaranteed to remain unchanged and may shift over time.
- the risk and reward indicator table demonstrates where a Fund ranks in terms of its potential risk and return. The higher the rank the greater the potential reward but the greater the risk of losing money. The lowest category does not mean 'risk free'.
- the Fund appears as a "5" on the scale. This is because the Fund invests in assets that typically carry medium risk and offer medium rewards compared with other categories of assets.

The indicator does not take account of the following risks of investing in the Fund:

- the value of investments and the income derived from them may fall as well as rise and you may not get back the original amount invested. Over time, inflation may erode the value of investments.
- the Fund will typically invest in between 40 and 75 stocks and so it is more concentrated than many other Funds which have greater diversification across a larger number of stocks. This means that the valuation of the Fund may be more volatile as a result of this concentration.
- there will be a variation in performance between funds with similar objectives due to the different assets selected.
- changes in market conditions may mean that it is not easy to buy or sell investments at a desired time and price.
- the insolvency of any institutions providing services such as safe-keeping of assets or acting as counterparty to derivatives or other instruments may expose the Fund to financial losses.

For full details of the Fund's risks please see Section 5 of the Fund's prospectus.

## CHARGES FOR THIS FUND

The charges you pay are used to pay the cost of running the Fund, including the cost of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges that may be taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested (Entry Charge) and before the proceeds of your investment are paid out (Exit Charge).

### Charges taken from the Fund over a year

Ongoing charge	0.69%
----------------	-------

### Charges taken from the Fund under certain specific conditions

Performance fee	None
-----------------	------

The entry and exit charges shown are maximum figures. In some cases (including when switching to other funds) you might pay less – you can find out actual entry and exit charges from your financial adviser.

The ongoing charges figure is based on an estimate of expenses of the Fund at launch. Ongoing charges may vary from year to year. The figure for ongoing charges excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another fund.

For more information about charges please see Section 7 of the Fund's prospectus.
